

Motorola Rugged Mobile Computers

## **RUGGED COMES IN MANY FORMS. WE OFFER EVERY ONE OF THEM.**

In harsh, unforgiving environments – particularly outside the four walls – you want mobile computers that can stand the heat (as well as the cold, windblown dust and moisture). Motorola Rugged Mobile Computers are more than up to the task. From size-optimized to ultra-rugged with modular keypads, they're designed to work in extreme temperatures, sealed to keep out the elements, and tumble and drop-tested to withstand the jolts of real-world use. In other words, they're built for the most demanding applications you can imagine. Best of all, these easily deployed Rugged Mobile Computers feature integrated wireless technology, enabling converged voice and data communication for your workforce, even when they're out in the field. It's the secret to unleashing maximum productivity across the enterprise. And it's just another way Motorola puts Enterprise Mobility in the palm of your hand. **HELLOMOTO™**
